

# GOVINDA CHAUHAN

govindach.iitp@gmail.com  
Delhi, India

## SUMMARY

---

AI-driven Software Developer with strong expertise in artificial intelligence tools, workflow automation, and building practical software systems. Experienced in teaching Computer Science at the high-school level, researching modern AI-driven education models, and developing mobile and web applications. Passionate about AGI technologies, AI productivity workflows, and designing next-generation digital systems. Skilled in turning ideas into clean, functional prototypes and applications.

## CORE SKILLS

---

- Artificial Intelligence Tools, Workflow Automation, AGI Systems
- Software Development, Problem Solving, Rapid Prototyping
- Mobile App Development (Expo, React Native), Web App Development
- Teaching & Communication, English Mentoring, Curriculum Design
- Research Writing, Data Analytics, AI in Education Systems
- Interests: AI Ecosystems, System Design, Software Management

## EDUCATION

---

**Indian Institute of Technology Patna (IIT Patna)** 2026 Batch  
BS in Computer Science & Data Analytics (CSDA)

## EXPERIENCE

---

**Computer Science Teacher — High School (Delhi)** 2023–2024

- Taught Computer Science fundamentals, programming basics, and digital literacy to high-school students.
- Designed engaging AI-related learning modules for enhancing creativity and early technical exposure.
- Mentored students in software thinking, logic, and practical problem-solving.

## PROJECTS & SOFTWARE WORK

---

### AI Workflow Automation Systems

- Built end-to-end AI pipelines for content creation, automation, and personal productivity.
- Integrated multi-agent AI tools for autonomous task execution.

### Mobile Applications (Expo/React Native)

- Created multiple mobile applications and prototypes with clean UI and practical functionality.
- Explored AI-driven app features and real-time components.

### Portfolio Websites & Software Tools

- Developed numerous personal and professional portfolios for clients and students.
- Specialized in minimal, modern, white-aesthetic UI designs.

## RESEARCH WORK

---

### Modern Quick Ecommerce and Its Problems

- Analyzed inefficiencies in speed-based ecommerce models.
- Proposed AI-assisted optimization solutions for logistics and decision-making.

### Gap Between Traditional Indian Education and AI-Driven Learning

- Researched limitations of the traditional education system in India.
- Proposed AI-integrated learning pathways focused on personalization and skill agility.

## ADDITIONAL DETAILS

---

- Strong interest in AGI and emerging AI tools; stay consistently updated with newest technologies.
- Excellent communicator with experience in English mentoring and public speaking.
- Hobbyist software developer with passion for building apps, tools, and creative digital systems.

## FUTURE VISION

---

### Vision47 (Confidential Startup)

An upcoming AI-driven venture focused on next-generation software, automation, and digital innovation in India.
