

GOVINDA CHAUHAN

Software Engineer, Agentic Systems Developer

Portfolio: govinda-01.vercel.app | GitHub: github.com/GC-WORK11 | LinkedIn: linkedin.com/in/govinda-flow | Email: govindasince2004@gmail.com | Delhi, India

Software Engineer and Agentic Systems Developer building scalable tools, open-source projects, and autonomous infrastructure. Passionate about shipping products that compound.

Education

Indian Institute of Technology Patna
BS in Computer Science & Data Analytics

- Computer Science and Data Analytics foundation with independent work across AI agents, evaluation systems, simulation, computer vision, and high-velocity product engineering.

2026

Skills

Languages: Typescript, Python, Rust, Golang, Node.js, Next.js, React, Vite, Flutter, React Native, Electron

Tools: Pi, Hermes Agent, Claude, Codex, Cloudflare, Ubuntu

Focus: AI agents, evaluation systems, full-stack pipelines, mobile control surfaces, automation, computer vision, simulation

Professional Experience

Independent
Software Engineer

- Developed and maintained full-stack applications and AI systems.
- Built Doorway, Kairo, CHIMERA, AETHER, VideoUnit, Flow Mobile, and CEO Hunt.
- Engineered production-grade environments handling full-stack pipelines, mobile control surfaces, and custom automations.
- Built local-first desktop infrastructure, research prototypes, and pre-execution supply chain security layers.

Delhi, India
2022 - 2026

Educator / Author
Computing Fundamentals and AI-Assisted Learning

- Taught computing fundamentals while experimenting with AI-assisted learning systems and practical student-facing software.
- Designed AI-aware learning modules and technical exercises.
- Mentored students in logic, programming fundamentals, and product thinking.
- Authored Applied AI Students Book as a student-facing learning artifact.

Delhi, India
2023 - 2024

Agentic Architecture & Tooling

Doorway (Agent OS) AGENT COCKPIT
Local-first desktop cockpit for terminal agents, git worktrees, review/merge flows, plugins, and visible automation.

VideoUnit AI VIDEO EVALS
Executable testing framework for AI-generated videos that converts prompts into temporal assertions and reproducible reports.

CHIMERA RESEARCH ENGINE
Autonomous multi-agent research workflow for scouting literature, reading PDFs, running experiments, synthesizing reports, and critique.

AETHER PHYSICS INTELLIGENCE
Marker-free physics extraction from video to discover kinematic structure, estimate parameters, and produce simulation-ready models.

Kairo AGENT SAFETY
Real-time cloud intelligence layer that checks package installs, terminal commands, and CI/CD changes against software risk data.

Idea to MVP

Doorway IDE DEVELOPMENT TOOL
Multiple models in one thread through their native CLI.

Flow Pitch MOBILE
Agents in your pockets.

CEO Hunt STARTUP MARKETPLACE
Marketplace platform connecting founders, investors, and operators.

DDSAS Platform DATA PLATFORM
Make your codebase production ready while you sleep.

Technical Artifacts

AETHER Architecture Physics from Video

- Architecture for extracting exact physical parameters from mechanism videos.
- Combines segmentation, tracking, kinematic discovery, differentiable simulation, and benchmark design.

fConnect E-Commerce Market Analysis

- A deeper look into the quick e-commerce market disruption of India.
- Analysis of rapid delivery models and market dynamics.
